

# Home Tab Customizations

## ***Combine Shapes***

These tools let you create your own custom shapes. They are not on the Ribbon, so you must add them.

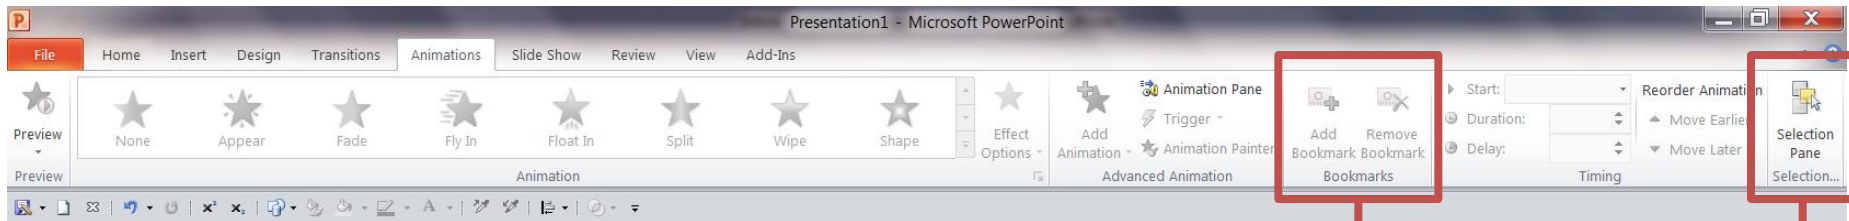

# Insert Tab Customizations

## ***Slides Group***

I always go to the Insert tab to insert a new slide, so I added the Slides group here.

# Animation Tab Customizations

## ***Bookmarks Group***

Added the Bookmarks group from the Video Playback tab, because I work with the animation Trigger to Bookmark and the Bookmarks at the same time. Having them on the same tab makes this easier.

## ***Selection Pane***

Easier to access when animating if it's right here. Saves me a trip to the Home tab to rename an object.
